

ENDPOINT MANAGEMENT WORKSHOP

Manage and protect your devices, your apps and your users

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace but this creates additional risks, especially when you consider that 70 million smartphones are lost every year.

This three-day workshop from Transparency will show you how to manage both company-owned and user-chosen devices in the Cloud. We will take a deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organisation, showing you the best ways to manage endpoints at the enterprise level. We'll also provide you with the ability to protect your authorised users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

Workshop highlights

Microsoft Endpoint Manager

Improve your Secure Score with Microsoft Endpoint Manager.

Valuable insights

Gain an understanding of your users' endpoint devices and their compliance with your IT policies.

Management policies

Learn to create management policies that protect your users, company data and devices.

Secure user access

Discover how to give your users access to the apps they need on their choice of devices.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

- Learn how to improve your management capabilities with Microsoft Endpoint Manager
- Discover and protect your endpoints by enforcing policies and deploying security tools
- Secure your identities with Multi-Factor Authentication (MFA) and conditional access from any device
- Enable your users to be productive with the applications they need, on the devices they want

Customised based on your organisation's unique needs

Engagement setup*

Design and planning

Customer value conversation

Discovery session for endpoints

Results, advocacy and next steps
