MICROSOFT THREAT PROTECTION WORKSHOP

Making Microsoft's next-generation security tools work for you

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Or whether personal data is being exposed? In short, is your organisation's Cloud environment as secure as you think it is?

With Transparity's three-day Microsoft Threat Protection Workshop, we'll assist you in achieving your broader security objectives and to develop a strategic plan customised for your organisation, based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the future. And we'll help you better understand how to prioritise and mitigate potential attacks, with:

- Deep analysis from Threat Check of cyberattack threats found targeting your organisation
- Actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity experts
- An inside look at Microsoft's holistic approach to security, and how it relates to your organisation
- Demonstrations of integrated security, including the latest tools and methods
- Suggestions from our Microsoft experts about your long-term security strategy, with key initiatives and tactical next steps

Workshop highlights

Understand your security goals and objectives.

Deliver the end-to-end Microsoft security story.

Showcase security scenarios with product demos.

Develop joint plans and next steps.

Workshop outcomes

Given the volume and complexity of identities, data, applications, devices and infrastructure, it's essential to learn how secure your organisation is, as well as how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current threats to your Cloud environment with Threat Check, plus identify potential ongoing issues.

Walk away with actionable next steps based on your specific needs and objectives.

Document your security strategy for the benefit of key stakeholders.

Better understand how to accelerate your security journey using the latest tools.
