

SECURING IDENTITIES WORKSHOP

Secure and protect user identities

Identity is today's control plane for digital transformation. Organisational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralised behind traditional network security.

Transparency's Securing Identities Workshop will show you how to stop tomorrow's data breaches by securing identities and devices today. During this three-day workshop, our experts will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture. Workshop highlights include:

- Get a rating of your identity security posture and see how it compares to your peers
- Gain insights into apps used in your environment – even ones unsanctioned by IT
- Understand how to prevent identities from being compromised
- Learn how to reduce costs and improve business agility and security with simplified app access

Workshop agenda

Understand your identity goals and objectives

Define your existing and desired identity security posture

Provide insights into apps used within your environment (sanctioned and unsanctioned by IT)

Showcase core IT and user security scenarios through demos

Develop a joint action plan based on key results

Workshop outcomes

Optimise identity

Identify potential risks related to identity and see opportunities for improvement.

Assess security posture

Receive a numerical rating of your identity security posture and see how it compares to similar organisations.

Reduce costs

Minimise expenses associated with password reset and helpdesk resources.

Increase visibility

Get a sample survey of apps your employees are using and if IT supports them or not.

Get in touch

Ready to get started? To book your workshop, just email hello@transparency.com and we will contact you with a choice of dates.
